ELECTRICAL RENTAL INFORMATION

SAVE MONEY & CONSERVE ELECTRICITY

RCS is working with the Sunroad Resort on an energy conservation plan. We are requesting that you please turn off the electrical devices in your booth at the end of the show each day. Sunroad Resort will be shutting off the power in the exhibit hall approximately 30 minutes after the published show hours and turning the power on about 20 minutes prior to show opening.

If you have not ordered 24 hour power and require your power to be continuous you should order it immediately at the RCS Service Desk. If your booth happens to be in the same circuit as another customer that has ordered 24 hour power and you have not shut down the power in your booth, you will be charged for 24 hour power as well.

If you do not require 24 hour power, please turn off your electrical devices at the end of each show day. As part of this conservation plan, we will be strictly enforcing the 24 hour power policy. Please help us and save the added expense if you don't require the extra electricity. Thank you.

ELECTRICAL ORDER CHECKLIST

- Check Rating Plates on your equipment to ensure that you will have the proper power to operate your booth.
- Do you require additional lighting? We can handle a variety of lighting options to enhance your display.
- Order 24 hour power if required for refrigeration, computer systems, water pump, heaters, etc.
- Indicate your electrical labor requirements for equipment hook-ups and/or power distribution on the electrical order form.
- If distribution is required, include a detailed electrical floor plan. Indicate both main power locations and distribution locations.
- Avoid code violations. Check the electrical code requirements on this information sheet.
- Labor is available to install and remove coaxial, fiber optic and twisted-pair cables for booth to booth, booth to satellite dish and within the booth.
- Place your order before the discount rate deadline and save on your electrical order.
- Payment must be included with your order to secure the discount rate. Include check or credit card authorization.

ELECTRICAL CODE

Electrical Requirements for an exhibit at all convention facilities are for the safety of all exhibitors and are based on national electrical codes and local ordinances.

Too frequently, fires have been traceable to faulty wiring, sometimes because of carelessness and sometimes because of lack of understanding of the risks involved.

In the interest of public safety, exhibits at all convention facilities may be inspected to determine if any violations exist. If they are found, qualified electricians are available to correct the problems. This work will be performed on a time and materials basis. If the exhibitor does not wish to have the fault corrected, electrical service to the offending booth will not be connected.

If an exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to convention facilities.

Serious risks are involved which can be eliminated by understanding basic requirement of safe wiring inside your booth. For the safety of you and the public, remember these points:

- All wiring must have a 3-wire grounded cord with a minimum of #14 gauge
- Spot or flood lighting is a hazard when lamps are too close to fabrics or other material which can be affected by heat.
- The use of clip-on sign sockets, latex or lamp cord wire in displays, or the use of 2-wire clamp on fixtures is prohibited by order of fire prevention bureaus at trade shows and conventions
- Zip cords or two-wire cords are ungrounded and could result in safety hazards. Their use is forbidden in all convention facilities.
